Gene Golub SIAM Summer School (G2S3)

Frontiers in multi-dimensional pattern formation

August 4th - 15th, 2025

Concordia University, Montreal, Quebec, CA

This summer school will study the current frontiers of research in the mathematical study of patterns, with a particular emphasis on the study of patterns in multiple space dimensions. Planned courses will highlight the important aspects of the known theory (mainly focusing on developments in the past 20 years), while providing a springboard for students to begin work in the frontiers of the field.

SIAM will be accepting proposals for the 2027 school in the fall
